

# Information Sheet

## Purpose of this study

The purpose of this study is to understand user perception of an intelligent system among users who interact with that system.

## What you will be asked to do in this study

In this study, you will be asked to look at a few images and answer some questions. For each image you will see a classification provided by the intelligent system and may be asked to give feedback regarding that classification. You will also complete a questionnaire regarding the study.

## Compensation

Unfortunately, there are no payments or rewards for participating in this study.

## Confidentiality

Your identity will be kept confidential and not shared with anyone to the extent provided by law. Your name or any other personal identification will not be collected with your response data or any of the data files associated with this activity. Additionally, only the approved members of the research team will have access to the data collected from the study. Also, the data being collected is regarding to the user's responses and interactions with the system and does not include any audio or video recording.

## Voluntary participation

Your participation in this study is completely voluntary. There is no penalty for not participating. You are free to stop your participation at any given time without penalty.

## Risks of the study

The risks associated with this study are minimal and no more than risks ordinarily encountered with daily computer use. This study should take no more than 30 minutes of your time. You may stop participating in the study at any time without penalty. The results from the study will be analyzed and published for research purposes, but it would not contain any personal information.
